Dear Enquirer,

Superbase 64 is a new concept in database management. It provides the power of large computers on a Commodore 64.

I enclose leaflets on **Superbase 64** - the complete information control system for the Commodore 64.

Superbase 64 is available through the Commodore dealer network in North America at a price of US \$99.

If you have any difficulties, please do not hesitate to contact me.

Yours sincerely
PRECISION SOFTWARE (USA), INC

Peter M. Thomas
Executive Vice President

Strengthen your hand

with Superbase 64

The complete information control system for the Commodore 64.

The World Famous Commodore 64.

Create your own formats, enter your records, change layouts and datafields.

Superbase gives you unrivalled control in home or office, business or professional practice, with a range of features including:

YOUR OWN RECORDS

- Design your layout
- Using text, numeric, calculated result, date, linking and key fields
- Record size, up to 1100 characters, spread over up to 127 items
- Number of records limited only by your equipment
- As many databases as you want - each with up to 15 files
- Learn fast through built-in HELP screens - then add your own notes

Superbase 64

No matter what your business or interest, with Superbase 64 you have a totally flexible 'record' system, as big as you want it, as fast as you need it.

TOTAL CONTROL

- Links to other programs and EASY SCRIPT for personalised mailings, high-quality letters, quotes, tables, etc.
- Effective management of invoices, addresses, stock, membership, appointments - any and every kind of record
- English like commands for easy conversational programming, plus built-in BASIC

DATABASE MANAGEMENT

- Easy to understand menus
- Add or amend fields, or alter length - no file rebuilding needed
- Update files with automatic batch processing option
- Calendar arithmetic for effective time management
- Display quantities, values, totals, as you enter them
- Formulae for on-screen result calculation.

commodore

Superbase 64

What is Superbase 64?

In computer talk, it's known as a database management and information retrieval system with a user programmable interface.

In English, it's best described as a great big filing cabinet which allows you to extract almost any piece of information, in almost any order, with multiple selection criteria.

Plus – you can design your own record layouts and either work entirely from the menu options or write your own special program to meet your needs exactly. If you have no programming experience, just use the **Superbase 64** command set.

Who needs Superbase 64?

You do! If you want a hand in managing your records, whether in business, at home or for pleasure, let **Superbase 64** carry the load.

Who is using Superbase 64?

The typical **Superbase 64** user will be a home or small business computer user who needs to store, update, access and act on information. Existing users and uses of **Superbase 64** include:

Firearms Dealer
Stock Control
Invoicing
Names and Addresses
Membership
Medical Specialist
Sales and Prospect Records
Budgetting
Contact Lens Records and Accounts
General Business Applications
Farm Records
Antiquarian Maps and Prints
Client Records and Accounts
British Airport Authority Engineering Records
Home Database
Catalogues of Personal Collections
Church Records
Forensic Medicine Blood Group Records
Teaching Records
Printing Company Records
Office Records
Hospital Shop Records
Bibliographies
Genealogy
Watchmaker Records
